

Genevive

Natalie Cowell, APRN, CNP

I have been a Nurse Practitioner for 6 six years and a Registered nurse for over 14. I love caring for patients as if they are my family, deserving of compassion, honesty, patience, knowledge, and a little bit of humor. I provide patient-centered care, aiming to maintain quality of life by listening to each person's unique goals and implementing plans to reach them.

I love spending my free time with family, reading, and working in my gardens. I look forward to continuing my career at Genevive and building relationships with my patients and their families.
